## G 482 Blitz Citro

Water-dilutable surface cleaner

**Ingredients:** <5% nonionic surfactants, contains preservation perfumes. Other ingredients: alcohol, auxiliary agents, colouring.

<b>Ecolabel</b>	<b>Percentage of readily biodegradable components according to OECD 301 or REGULATION on detergents</b>	<b>Theoretical oxygen demand</b>	<b>Phosphorus content (calculated as elemental phosphorus)</b>
	96.6 %	350 mg / g	-

Environmental impacts of the product are predominantly due to its content of surfactants, which are toxic to aquatic organisms. Together with most of the other organic components they are, however, largely degraded during the usual process time of sewage in treatment plants. Remnants eventually released into natural waters are immediately subject to further degradation processes and will soon disappear from the environment.

Non-readily biodegradable components consist practically exclusively of fragrances (etheric oils), which according to their function in nature are only slowly biodegraded.
